

TECHNICAL RIDER

Name of the show: REX

Name of the company: Chilowatt -electric company+

Duration: 30 minutes

Stage dimensions: 6x6 m

Water access: water point near the performing area accessible during the set up

Power connection: Yes, with cable long enough to be in center stage

Audio: 2 active speakers (minimum 300 W RMS each) + stands, mixer with XLR inputs

Lights: Lighting system suited to the performing area. Intimate atmosphere. Possibility to switch off the lights during the show (NO need of complete darkness).

Set up time: 120 minutes

Disassembling time: 40 minutes

Storage area: Storage area near the performing area to leave the artistic material in case of multiple days. The space needed is approx. 1,5 m²

A little bit of water will be spilled on the floor (the amount is more or less 2 litres)

the general atmosphere of the show is intimate a little bit creepy and noir so it is best suited for not chaotic or very noisy places.

Company description: Humans and technology, imperfection and logic which coexisting create paradoxes and unique balances. Chilowatt is a project founded in 2014 in Rome, Italy. The idea behind the project is to use technology as a tool for universal languages such as contemporary circus, theater and performance.

Show description: What if Nikola Tesla had been a juggler ?! Or a musician ?! Intimate, noir, creepy and funny, inspired by one of the greatest scientist of the last century. *DANGER* REX is an high voltage show and it will electrify the public!
